Shield parts in classified bo4

This guide will show you how to build the zombie shield on Ranked. You must collect 3 parts to build the Riot Shield. Just like the other shields, it consists of 3 parts that have 3 positions each. Here are all the parts and their locations: Handle The handle can be found in the central storage area, right next to the departure room. You'll need to open a location #1: Turn left right after entering the room. It's leaning against the wall under the counter. Location #2: Leaning against lockers in the center of the room. The buy wall of the RK7 Garrison is located just behind the aforementioned filling cabinets. Location #3: On the left side of the door leading to the main offices, between two broken glass panels on the floor. Shield The Shield is located in the War Room: Lower Level. Position #1: Just below the ladder on the left side. Location #2: In the center of the room from the circular map on the floor. Location #3: Looking up the stairs, in the rightmost corner on the opposite side of the room, sitting next to and office desk. Very hard to see. Visor The visor is located in the Laboratories. Position #1: In the room with the power switch on the floor. Position #2: Next to teleportation 3, on the left side of the door labeled Weapon Test. Position #3: Next to teleportation 2, sitting in front of 2 metal intilates stacked on the left. The work bench makes their way to one of the two work bench to assemble the Riot Shield. Location #1: In the central storage area where you have already taken the shield handle. On the right side of the door leading to the main offices. Location #2: In the gun rehearsal room next to teleportation 3. All done! This is all the possible shield part that generates points on the classified map of Call of Duty Black Ops 4. After finding the 3 parts, assemble the shield on the work bench as shown above. There are multiple shields in Call of Duty: Black Ops 4, but they are all built the same way. You can find a Wonder Weapon special shield in multiple zombie maps — including IX, Blood of the Dead, and Classified — and interestingly, the shields are completely different on each map. On some maps, you'll be able to suck zombie souls out, while in others you'll have access to a gun to go with your riot shield. There is also an ancient Roman variant with a ghostly silhouette. The trick to building all the shields is quite simple - you need to know where to find all the parts. After collecting the three parts, you will be able to build the shield in any work bench. Unfortunately, the parts lay eggs in random locations. There are only a handful of spawning locations for each part, so if you want to track down all these missing parts, you'll need to check out all the random spots of spawn. We have them listed below. Position 2: In the weapons room next to Teleportation 3. Shooting with the Riot Shield. The Riot Shield returns with all the same useful features as other Black Ops 4: Zombie maps. As always, you need to track down three parts that randomly appear in a variety of different locations. They're not too hard to find – the problem is that you're driven out of a swarm of zombies. I'm on your tail every which makes it a bit of a trick for research. With that in mind, we're going to list all the locations we've found (so far) to help you build this Shield. It's not a unique variant - it's just like other maps. You get a gun that you can fire while on the move, or you can lock the gun in the shield itself to provide additional protection that also slows down. One of the advantages of the shield is that once it is built, everyone on your team can grab one. They protect your back when it's not equipped, but the shield will shatter if it takes too much damage.
